

'HOW TO'

Activities...

Natural Photo Frames

This activity allows your child to explore their natural environment as they look for their natural fallen resources.

- ☑ Search for your natural fallen objects in your garden or whilst out for your daily walk.
- ☑ Cut out your photo frame from cardboard, card etc and role model how to use the scissors carefully.
- ☑ Allow your child to decorate their photo frame with their natural objects. You can use glue, tape or even thread the decorations between string.
- ☑ Encourage your child to speak about the textures, colours and shapes of what they are using.
- ☑ Fill your frame with your favourite photo and give to mummy!
