

'HOW TO'

Activities...

Nature Heart Weaving

This activity allows your child to explore their natural environment as they look for their natural fallen resources. Not only does it focus on the motor skills when using their fingers to work between the thread, it also encourages problem solving, trial and error and thinking skills when finding pieces to fit.

- ☑ Search for your natural fallen objects in your garden or whilst out for your daily walk.
- ☑ Cut out your heart shapes, role modelling to your child how to use scissors carefully
- ☑ Gather your string/thread/elastic bands etc and tie around the hearts
- ☑ Allow your child to decorate the heart with their natural objects, weaving through the thread
- ☑ Present your heart to mummy!

Creating awe and wonder in every moment
